

Investing in Neighborhoods

Providing quality services means providing for basic improvements that make for quality neighborhoods. Our investing in neighborhoods program is continuing this year with an additional four percent increase over fiscal year 2007, bringing our total investment to \$6.45 million. The program includes projects and enhancements such as sidewalks, street resurfacing and maintenance, traffic calming devices,

Last year city crews filled over 11,700 potholes.

and street signs and markings. These neighborhood improvement projects directly impact the quality of life of Tampa's residents - a valuable investment.

Road Resurfacing & Maintenance

Our program this year will repave approximately 36 miles of roadway.

This year we expect to replace 5,000 signs throughout our city and 20 intersections will receive illuminated signs.

Street Signage

Our signage program includes street name signs, illuminated signs, traffic signs and marking installations.

Sidewalks

Our sidewalk program will install and repair nearly eight miles of sidewalk this year to help ensure pedestrian safety and contribute to our sense of community.

Traffic Calming

Traffic calming devices help promote and maintain the safety and livability of our residential streets. This year more than seven projects are planned throughout Tampa's neighborhoods.
