

Building Better Roads for You . . .

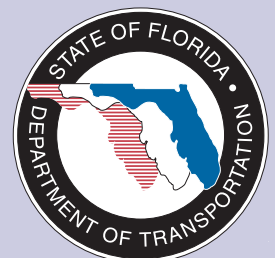

Nebraska Avenue (US 41) Between Kennedy Boulevard and Hillsborough Avenue Resurfacing Project

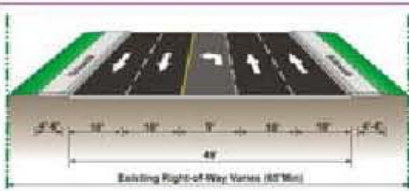

Lane Construction Corp., the Florida Department of Transportation's contractor, is scheduled to begin construction activities on Nebraska Avenue between Kennedy Boulevard and Hillsborough Avenue in June.

The three mile, \$11 million project is anticipated to take approximately two years to complete. Primary improvements include resurfacing and re-striping Nebraska Avenue and installing some new drainage pipes. The majority of the work will be done during the day.

- Between Zack Street and Lake Avenue and between Genessee Street and Frierson Avenue, the road will be re-striped to create a three lane roadway with dedicated bike lanes.
- Between Lake Avenue and Genessee Street and between Frierson Avenue and Hillsborough Avenue, the road will be striped in as it is currently and will not have dedicated bike lanes.
- To help improve drainage, new pipes will be installed at Twiggs Street, Chelsea Avenue and Floribraska Avenue.
