

Investing in the Basics

Since her first days in office, investing in neighborhood basics has been a priority of Mayor Lorio's administration. With the support of Tampa City Council, the amount for basic street improvements in neighborhoods has more than doubled since fiscal year 2003. This year we are investing nearly \$5.5 million to improve neighborhood streets, a 12% increase over last year.

This year, particular emphasis has been given to increasing funds for street resurfacing. Bringing all of our streets up to acceptable standards is our goal.
