

Daily Water Use at Home

Complete this survey to estimate how much water is used in your home in one day.

Average Use: Write the number of times that you and your family members do each activity in one day. Then multiply the number for **Water Used** by the **Number of Times** the activity is done. This will give you the number for the **Gallons Used** column.

Calculated Use: Record the number of total minutes used for each activity. Then multiply the number for **Water Used** by the **Number of Total Minutes** to find the number for the **Gallons Used** column. For an activity you didn't do, place a 0 under **Gallons Used**. Add all the numbers under **Gallons Used** to find the **Total Gallons Used**.

AVERAGE USE			
Activity	Water Used (Nonconserving Fixtures)	Number of Times	Gallons Used
Garbage Disposal	4 gallons per minute		
Dishwasher	12 gallons per load		
Toilet Flushing	5 gallons per flush		
Bathing	36 gallons (full tub)		
Laundry	43 gallons per load		
CALCULATED USE			
Activity	Water Used (Nonconserving Fixtures)	Number of Total Minutes	Gallons Used
Brushing Teeth	4 gallons per minute		
Washing Hands	4 gallons per minute		
Washing Dishes by Hand	4 gallons per minute		
Shower	5 gallons per minute		
Yard Watering with Hose	9 gallons per minute		
Total Gallons Used			

Discuss with your family ways to conserve water at home. Write two of the ways on the lines provided. Decide how you will help each other practice your new habits. Share ideas with your classmates.

Water-Saving Tips

▶ **Garbage Disposal**

A garbage disposal requires a lot of water to operate properly. Use a disposal only when necessary.

▶ **Dishwasher**

Use your automatic dishwasher only for full loads.

▶ **Toilet Flushing**

Avoid using your toilet as an ashtray or wastebasket. Tissues, insects and other things belong in a trash can, not the toilet.

▶ **Bathing**

Take only shallow baths.

▶ **Laundry**

Run only full loads in the washing machine. Running the machine when it's full will save you time, energy and water.

▶ **Brushing Teeth**

Turn off the water while brushing your teeth.

▶ **Washing Hands**

Don't let the water run while you are washing your hands.

▶ **Washing Dishes by Hand**

When washing the dishes by hand, let the dirty dishes soak in soapy, hot water. Rinse them quickly under a slow stream from the faucet.

▶ **Shower**

Limit the time water runs while you're taking a shower. Install a low-flow showerhead.

▶ **Yard Watering**

Water only when 50 percent of the lawn shows signs of wilt: leaf blades folded in half, blue-gray color and footprints remain on the lawn.
