City of Tampa
Contract Administration Department
306 E. Jackson St. #280A4N
Tampa, FL 33602
(813)274-8456
GENERAL NOTES

1. The scope of this project shall consist of rehabilitation of 8", 10", 12", 15", and 18" CMWasteMaster pipeline by cleaning, determining, and installation of pipe liner and all appurtenances associated with completion of the project.

2. Elevation information shown on these plans is referenced to N.G.V.D. 1929 unless otherwise stated.

3. Sheets 47-104 are the existing as-built of the system pipe to be rehabilitated.

4. During the contract, contractor must maintain access to all drainages for the duration of the project.

5. Contractor shall be fully responsible for obtaining the necessary road closing and right-of-way permits from the appropriate government agencies having jurisdiction over the specific roadway.

6. In order to obtain roadway closure or right-of-way permits, at minimum, the contractor must submit detailed maintenance of traffic (MOT) plans along with applications to the appropriate agency. The MOT plans shall conform to applicable Florida Department of Transportation (FDOT) guidelines (most current edition). The governing agencies may require additional information and dictate specific work times during high-peak traffic hours. Refer to specific provisions for specific traffic control requirements.

7. Contractual survey service must be maintained at all times. Work during low flow periods or night work may be required. Contractual survey is responsible for maintaining property and city surveying and permitting utility services. Any information as to existing facilities as necessary to maintain service. Cost for this work shall be included in the various contract items and no additional payment will be made.

8. Bypass pipes shall be capable of delivering 150 gpm for 8" CMW pipe, 250 gpm for 10" CMW pipe, 350 gpm for 12" CMW pipe, 500 gpm for 15" CMW pipe, and 600 gpm for 18" CMW pipe. The bypass piping shall be of the self-drainage type and shall have a minimum of 3 feet of pipe above the elevation of the pavement. The bypass piping shall be designed and approved by the Engineer.

9. The proposed liner thicknesses for the 8" CMW shall be 8.0 mm thickness and 10.0 mm thickness and 12" CMW shall be 8.0 mm thickness and 15" CMW shall be 10.0 mm thickness.

10. Contractor shall coordinate all construction activities with wastewater personnel and pumping station operations.

11. Construction standard equipment such as safety harnesses, gas monitors, lower explosive limit (LEL) detectors, breather fans, etc. shall be utilized where the work dictates their use.

12. For the manholes in foot maintained roadways, the contractor shall notify foot maintenance crews at 7:00 a.m. a minimum of 24 hours prior to starting the rehabilitation work. The city will obtain the necessary right of way utility use, permits from foot. However, the contractor shall provide traffic control devices in accordance with the foot standard index drawings (most current edition).
