COMMERCIAL TERMITE PROTECTION REQUIREMENTS

Updated August 2019

REFERENCE

Florida Building Code, Sixth Edition (2017)

105.10 Certificate of protective treatment for prevention of termites.

A weather-resistant job-site posting board shall be provided to receive duplicate treatment certificates as each required protective treatment is completed, providing a copy for the person the permit is issued to and another copy for the building *permit* files. The treatment certificate shall provide the product used, identity of the applicator, time and date of the treatment, site location, area treated, chemical used, percent concentration and number of gallons used, to establish a verifiable record of protective treatment. If the soil chemical barrier method is used, final exterior treatment shall be completed prior to the building final.

REQUIREMENTS

Florida Building Code requires pest management professionals who offer preventative treatment for subterranean termites for new construction to provide a Certificate of Compliance to the building department when treatment is completed.

- The Certificates of Compliance may be uploaded directly into the permit record via our online portal at aca.tampagov.net or emailed to CSDHelp@tampagov.net.
- The document must be submitted to and approved by the building department before a Certificate of Occupancy can be issued.

A sample of the acceptable form per the Florida Department of Agriculture and Consumer Services is included on page 2 of this document. Note that while we may accept certificates that vary from the aesthetic element of the sample document, the information required per code must be contained herein.

Notice of Preventative Treatments for Termites
(as required by Florida Building Code (FBC 105.10))

Company Name and Telephone Numbers

Address of Treatment or Lot/Block of Treatment

_____ **Date** _____ **Time** _____ **Applicator**

_____ **Product Used** _____ **Chemical Used (active ingredient)** _____ **Number of gallons applied**

_____ **Percent Concentration** _____ **Area treated (square feet)** _____ **Linear feet treated**

_____ **Stage of treatment (Horizontal, Vertical, Adjoining Slab, retreat of disturbed area)**

As per 105.10 If soil chemical barrier method for termite prevention is used, final exterior treatment shall be completed prior to final building approval.

If this notice is for the final exterior treatment, initial and date this line _____.
