

# 2908 S Westshore Flooding Relief

Flooding Relief FY2017, District 4

Estimated cost: \$100K

## JUSTIFICATION:

The location has inadequate surface water conveyance due to roadway super elevation resulting in frequent yard and street flooding. The project is desirable because it will provide relief for localized flooding.

## PROJECT DESCRIPTION:

The project consists of installation of a trench drain system to alleviate flooding at a low lying area at 2908 S. Westshore.
