

CLEAN & CLEAR

The City of Tampa and Local Landscapers are Working Together to Help Residents Keep Our Streets Clean & Our Waters Clear

Stormdrains are intended to take rainwater out of our streets and neighborhoods and place the water in our waterways. Stormdrains keep our neighborhoods from flooding.

Yard clippings in storm drains cause clogging, flooding, and pollute our waterways, harming marine plants and animals.

So instead of disposing yard clippings into gutters and storm drains, the City of Tampa and landscapers are encouraging the reuse of yard clippings. Yard clippings act as natural fertilizers that will help your lawn grow. For more information on how yard clippings can be beneficial call the Florida Yards & Neighborhoods at 813-744-5519
