

## Interbay Boulevard/Tanker Way Intersection [Dual Right Turn Lane Widening] Project

### Project Location

City Project No: 1001180

Overview Map

Detail Map

### Project Description

The City of Tampa proposed roadway improvements at Interbay Blvd., between Manhattan Avenue and Tanker Way. These improvements will provide an additional right-turn lane on Interbay Blvd. and realign the existing roadway between Manhattan Avenue and Tanker Way. The improvements will help the vehicles traveling in east direction by reducing their delay and for vehicles entering into MacDill AFB with the additional storage.

At present single R-turn lane at Interbay Blvd. between Manhattan Ave & Tanker Way, east bound traffic, gets blocked due to limited storage capacity i.e. with single R-turn lane at Interbay Blvd. The vehicles entering MacDill AFB have to wait at check point, so, single Right turn lane is not enough for a storage for vehicles entering into the Base. The proposed second right turn lane will provide additional storage and help to the vehicles going through on Interbay Blvd.

The proposed improvements include additional roadway construction, i.e., Right turn lane construction at Interbay Blvd. with the necessary drainage improvement, utility relocation and the construction of curb & gutter. Additional right-of-way will be needed at south of Interbay Blvd., that will be from City and/or MacDill AFB.

## Project Costs and Schedule

Phase	Firm	Cost	Funding Source	Schedule Start	Schedule Finish
Design	DRMP	\$69,952	Impact Fees	March 2019	August 2020
Construction	TBD	\$132,000	TBD	TBD	TBD
