

## West Fortune Street Complete Streets Project

LAP Complete Street Project | City Project No: 1001221; FPN: 436639-1

### Project Description

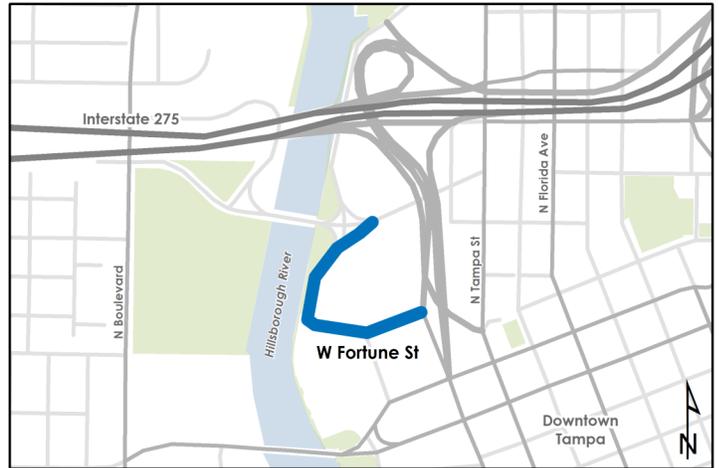

The limits of the West Fortune Street Complete Streets project spans from West Laurel Street to North Ashley Drive, and the project is currently being evaluated for complete streets improvements along the corridor. An engineering consultant was procured to work with the City and key corridor stakeholders to develop alternative corridor concepts which may incorporate complete streets elements such as widened sidewalks, raised intersections and pedestrian crossings, pedestrian actuated flashing beacons ("RRFB's), curb extensions, and median islands. Examples of some complete streets elements are shown below.
