

# Irrigation Worksheet

Use this worksheet to estimate how much water your irrigation system uses. Complete more than one sheet, changing number of irrigation days per week and/or zone run times to compare potable water costs when run schedules are revised.

1. Are you irrigating inside Tampa city limits?                      Yes                      No
2. How many days a week do your irrigate?
3. Do you have a working rain sensor on your irrigation system?                      Yes                      No
4. Use the column below to indicate how many minutes each zone in your system runs.

Zone 1	Estimated gallons per irrigation event	
Zone 2		OPTIONAL CALCULATION
Zone 3		Enter the estimated square
Zone 4	Estimated ccf per irrigation event	footage in your landscape to
Zone 5		estimate irrigation in inches per
Zone 6		event. This feature activates only
Zone 7		when information has been added
Zone 8		to #4 on this sheet.
Zone 9		
Zone 10		Estimated square footage
Zone 11		being irrigated
Zone 12		
	Estimated gallons per month for irrigation	
		Estimated irrigation in
	Estimated ccf per month for irrigation	inches per event

Estimated monthly irrigation cost

*Estimated cost does not include utility tax or base charges.*

*Note: Where the required rain sensor is in place, significant rain events during the month should reduce irrigation volume and costs. Please contact a member of the Tampa Water Department Water Efficiency Team via email at Savewater@tampagov.net or call (813) 274-8121, option #5, for more information about water use reductions and savings.*

306 E. Jackson St. • Tampa, Florida 33602 • (813) 274-8780 • Fax: (813) 274-7886

*Disclaimer: The calculations in this worksheet are estimates based on area averages and may or may not accurately reflect irrigation volume and costs for your location. The calculations assume a 2.5 person household with typical indoor water uses and a 12-gallon-per-minute delivery rate for each zone. The irrigation cost reflects current City of Tampa water rates and will not accurately reflect estimated irrigation costs for locations served by other water utilities.*
