

Water Connection and Service Fees

Water Connection Fees

Additional fees may be required under unusual circumstances. If it is not financially feasible for the Water Department to provide services, customers may be given the option of receiving service by paying the cost the City would incur to extend the service. All fees and deposits must be paid prior to the installation of mains and meters.

Contribution in Aid of Construction (CIAC) Fees

Each new and existing customer in the defined CIAC areas requiring new water service or additional water demand quantities shall pay a contribution in aid of construction to support the cost of infrastructure improvements. This charge will be in addition to Tampa Water Department standard connection fees.

Contribution in Aid of Construction Area	Effective after 3/15/2012
Downtown and South Tampa	\$2,145/ERU
Northeast Area	\$2,145/ERU
Northeast Area Sub 2	\$2,145/ERU

ERU = Equivalent Residential Unit (300 gallons per day)

Fireline Service and Connection Fees

In accordance with City of Tampa City Code Section 26-95, fire protection systems connected to Tampa Water Department mains must include an approved detector check valve to detect possible leakage or unauthorized use for other than fighting fires. If periodic inspection of the detector system by the City indicates that water is being used for other than fighting fires or if the system shows excessive leakage, the owner must pay the Tampa Water Department for the cost of installing an approved water meter and the meter will be installed as a regular account, subject to all rules, regulations and appropriate water rates.
